Refund Processing Standard Operating Procedure

Document: SC_Refund_Processing_SOP.pdf
Version: 1.0
Effective from: 2024-01-01
Effective to: No end date
Status: Current

1. Scope

This SOP describes limits, payment status checks and approval controls for refunds.

2. Refund limits

The approved amount must not exceed the item price multiplied by the quantity returned.

Shipping charges are refunded only when the return reason is DEFECTIVE or WRONG_ITEM.

3. Payment status

A refund can be disbursed only when the order payment_status is PAID or PARTIALLY_REFUNDED.

An order with payment_status REFUNDED needs human review before any further refund.

4. Duplicate checks

A return must not have more than one COMPLETED refund record.

If a COMPLETED refund and a PENDING refund both exist for the same return, hold both and escalate for review.

5. Approval controls

Only authorised staff approve, reject or release refunds in the payment system.

Automated assistants may summarise refund facts and flag issues. They must not approve, reject or pay refunds.
